

I am very concerned about the consolidation of media sources by large corporations. As I see it we have already compromised the integrity of the news we get. The fact that Docket -02-227 is virtually unknown to the American public is all the proof needed to substantiate this claim. To find the truth we need to hear all sides of a story. To have a true democracy the people must have all the information available and a forum to be able to come to a consensus. The FCC is responsible for insuring that we have access to all the information and congress is responsible for the forum to make our voices heard. Any one who votes to increase further consolidation of OUR air waves is culpable in plunging a dagger in the back of democracy. VOTE NO!
